

The Link Summer 2006

Promoting reuse and recycling in Nebraska

Celebrating a Decade of Pollution Prevention

2006 marks the 10th anniversary of the Partners in Pollution Prevention (P3) Internship Program. Operated by the University of Nebraska Extension, and the College of Engineering, the program is primarily funded by the EPA, NDEQ, and participating businesses. Each summer it places about 15 junior and senior engineering/science students from around the Midwest with Nebraska businesses. Interns receive pollution prevention training in Lincoln before being deployed across the State for the summer. The Materials Exchange Program (MEP) is one of several organizations & businesses that participate in the training process. Interns learn about the mission of the MEP, examples of creative reuse & recycling strategies, and how to use the Exchange

website for their own projects. Although the MEP doesn't track P3 intern participation directly, at least 8 students have posted no fewer than 16 listings with us over the past 2 summers.

Internships are conducted in 1 of 3 "Assistance Modes". Some students receive an "Industrial Placement" where they spend the entire summer with the same company. These interns become experts in the processes of their industry. Students then identify & report on processes where change can lead to reduction of company waste streams. Businesses wishing to participate in this mode of assistance provide a workspace, and help subsidize the intern's salary.

Other students work together as environmental consultants in "Industrial Assessment" teams. Each member focuses on a particular discipline, or process and bring their information together at the end of the assessment. The time commitment per company is less than with the Industrial Placement Mode so assistance is provided at no charge to the business.

Still others work in a "Small Business" Mode. Interns are given a region within the state where they spend their summer on several short projects. They

work alone, and generally spend only a few hours on site before a report detailing recommendations is submitted free of charge. Interns also give pollution prevention presentations to area community and student groups.

Regardless of the Assistance Mode, interns help clients minimize waste and save money by reducing operational and liability costs. Students conduct pollution prevention (P2) projects that focus on reducing industrial pollutants *during* the manufacturing process rather than trying to find solutions for waste at the end. This can lead to more sustainable systems, prevent the degradation of living systems, and cut down on the use

of toxic chemicals. Students end their internship with a written report and oral presentation of their experiences.

Since 1997, over 115 interns have assisted a total of 340 clients in over 40 Nebraska communities. Forty-two percent of recommendations have been implemented, resulting in more than 18,000 tons of solid waste diverted from landfills. Savings to Nebraska businesses total over \$6.2 million dollars. A quick look at the MEP database

reveals that P3 students, and the businesses they interned for, have diverted over 1,000,000 lbs from Nebraska landfills in the last two years alone by using the Materials Exchange Program.

Thanks to the University of Nebraska, program sponsors, and participating businesses, the next generation of environmentally minded professionals receive invaluable training in the practical application of their ideals. Thanks to the Interns, Nebraska businesses learn new ways to reduce their impact on the environment, and extend the life of our landfills. As we stand on the cusp of an environmental revolution in industry, you can be sure that the Partners in Pollution Prevention program is helping train the vanguard. For more information on how you can participate, please contact Program Coordinator Stacey Hawke at 402-472-2838.

Used Oil Collection Program Update

Every couple of years in these pages, we update you on the progress of the Used Oil Collection Program (UOCP). The 10 collection sites in SE Nebraska we started with in 2000, have grown to 67 across the entire state. Grant year 2006 set a record of more than 183,000 gallons collected bringing the UOCP total to date, to more than 668,000 gallons! The oil is sold to a contractor who reuses it in the production of asphalt. This allows collection sites to remain self sufficient, and has started to attract businesses to the reuse program as well. As beneficial as that is to our bottom line, the program was started to give rural Nebraska's farmers and ranchers a cost effective way to dispose of used oil following the passage of LB1257 in 1994. Some communities have really taken to the program, bringing in thousands of gallons every quarter, and we're not talking Lincoln and Omaha here. Our best collection sites include Custer & Dixon Counties, Aurora, and Sidney who are consistently in the 1800-3000 gal/quarter range. If you have used oil, or know someone who does, contact Keep Nebraska Beautiful for the collection site near you!

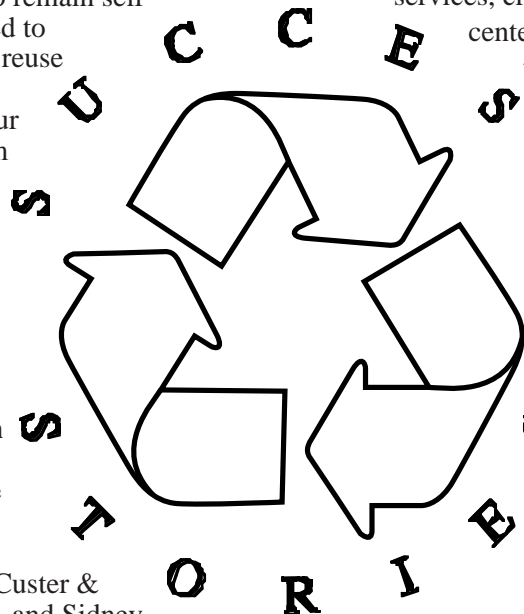

Student Desks Find Several Homes

Recently, Richard Young Hospital in Kearney was able to provide students with desks from Nebraska Wesleyan University in Lincoln. The 70 desks also enabled students to have a desk in their rooms. In all, 130 desks and 40 lab stools from the University have gone to 10 schools, & organizations so far this year. Our thanks to Nebraska Wesleyan for their continued support of the MEP & our mission to get organizations, institutions & associations the materials they desperately need!

Sewing for Babies

Sharon Minear, a Lincoln resident, recently decided that she was never going to learn how to use the serger sewing machine a friend had given her. Rather than throw it away, she decided to call the MEP to see if we could find a good home for it. Boy did we ever! Sewing for Babies is a non-profit organization whose volunteers make clothing & blankets for premature, sick, and needy babies. They deliver to hospitals, social services, crisis pregnancy centers, abuse centers, WIC offices, and individual families. The group provides a free "layette" with quilts, receiving blankets, blankets, crib sheets, sleepers, caps, booties, bibs, & a stuffed animal. For more information on how you might help this and similar organizations, please contact the Materials Exchange Program for listings.

MedShare Helps Ukraine

The MEP recently facilitated an exchange that sent 6 hospital beds, and 2 wheelchairs, from the Malone Center in Lincoln, to a rehabilitation hospital in Ukraine. The recipient, MedShare Nebraska, is a partnership between MedShare International of Atlanta, GA and Madonna Rehabilitation Hospital. They recycle surplus medical supplies and equipment for use by healthcare institutions in developing countries, regardless of institutional, religious, or political affiliation. It is a terrific opportunity for MEP participants to act locally and have a worldwide impact. If you have materials to donate to the MedShare Nebraska Project, or similar organizations, contact Keep Nebraska Beautiful for their listing information.

Nebraska Materials Exchange

The purpose of this form is to identify any waste or surplus materials from one business, industry or school that could be utilized by another. The more information you provide, the more likely an exchange will occur.

Company/Organization

Contact	Date	
Mailing Address		
City	State	ZIP+4
Phone ()	Fax ()	

Note: Please complete all applicable items. If you have more than one item, please copy this form for each material, or attach a list of materials and the quantity of each one.

1. Is your company/organization a 501(c) 3 nonprofit organization? Yes No
2. May we release your name/address/phone to interested parties? Yes No
3. Are you SEEKING or GENERATING this material? Seeking Generating
4. Please Specify Material Here: *Generic name or primary usable constituent (If plastic, list mfg. & commercial name/grade #):

5. List quantity (in units: pounds, etc.): _____ Per: Day Week Month Quarter Year 1X only
6. Physical state: (if applicable) Liquid Slurry Solid Semi-solid Sludge Dust Cake Gas Other _____
7. Packaging: (circle one) Bulk Drums Dumpsters Gaylords Pallets Bales Other _____
8. General information as known: chemical composition, type of plastic, main ingredients, cost, pH, toxicity, reactivity, color, particle size, flash point, total solids, purchase date, industrial process generating this material, contaminants, etc.

9. Available to interested parties: (if applicable) Sample Lab Analysis Independent Analysis
10. Please list any items your company would be willing to donate to schools or nonprofit organizations. (Working computers, office furniture and equipment, cleaning supplies, etc.)

Thank you for your interest in the Nebraska Materials Exchange Program (MEP). We'll send a copy of our quarterly newsletter, **The Link**, & keep in contact regarding your listing. If a MEP referral results in a match. we'd appreciate the information.

Please mail or fax this form to:

Keep Nebraska Beautiful,
 3201 Pioneers Blvd., Suite 306, Lincoln, NE 68502-5963
