

EPA National Framework for Advancing the U.S. Recycling System

In response to ongoing changes in international recycling markets, EPA recently released a National Framework for Advancing the U.S. Recycling System. Capping a yearlong collaborative effort among representatives of 45 federal, state, local and tribal governments, the recycling industry, non-profit organizations and manufacturers, the framework identifies "specific actions to take in addressing the challenges and opportunities facing the U.S. recycling system." Here's a summary of their efforts.

Challenges identified by the group include:

- Confusion about what can be recycled, which often leads to recyclables in the trash and trash in the recycling bin;
- Outdated recycling infrastructure that can't keep up with today's diverse and changing waste stream;
- Reduced export markets for recycled materials, requiring that domestic markets be strengthened;
- Varying methodologies of measurement which make it difficult to create effective goals and track progress.

The framework then pinpoints four corresponding action areas critical to addressing these challenges and identifies specific actions agreed to by EPA and members of the group. For starters, participants agreed to promote education and outreach in an effort to address public confusion about proper recycling prac-

tices, the value of buying products with recycled content, and the prevention of contamination in the recycling stream. Initial efforts emphasize positive and consistent messaging by articulating the benefits and value of recyclables as a commodity to be managed rather than wasted. EPA in turn, agreed to improve public awareness of the group's work by showcasing their accomplishments. Going forward, they look to develop a set of common recycling messages on nationally significant issues like keeping bags out of the system, or the importance of consistent labeling.

The challenge of outdated infrastructure will be met by facilitating innovative and adaptable enhancements to systems in need of upgrade nationwide. A comprehensive list of available infrastructure funding will be compiled and made available to stakeholders across the country. Meanwhile, EPA will develop a national map of existing infrastructure in order to give a clearer picture of where gaps exist.

They then plan to:

- Address local differences in recycling systems;
- Advocate for increased infrastructure investment;
- Research investments that have demonstrated success;
- Identify potential new investments going forward.

To address the collapse of export markets, the group will strengthen existing domestic secondary markets and promote the develop-

ment of new regional end markets through workshops held across the country. Workshops will then be followed up by the release of a market-development toolkit to answer FAQs, and provide guidance on best practices that help to meet current and future needs. EPA will further develop voluntary incentives to increase recycling and demand for post-consumer materials and then measure their success by assessing follow-up activities in participating states. Going forward, the group looks to encourage the use of recycled content among packaging designers and explore economic models that create robust and sustainable domestic secondary markets.

The challenge of varying methodologies will be met by compiling information on a range of metrics and measures used by organizations across the recycling system, including definitions, the types of analyses supported, where measures and metrics apply, as well as pros and cons of various measures. Meanwhile, EPA will work with other federal agencies and seek public input to establish national recycling definitions in an effort to foster common understanding and improve national measurement. Once complete, EPA plans to:

- Use the workgroup definition of recycling and the system diagram to create metrics of measurement;
- Develop additional draft definitions associated with materials flow through the system;

- Centralize the compilation of data and metrics used to measure recycling or components of the system;
- Compile results of workgroup activities (definitions, material flow map, metrics, and measures) for integration into Measuring Recycling: A Guide for State and Local Governments.

Finally, the group also supported comprehensive solutions that address all four action areas together, like a publicly accessible, web-based portal that will serve as a clearinghouse for recycling tools and resources. EPA will further continue to facilitate workgroup meetings and dialogues that advance the National Framework.

In conclusion, EPA makes it clear that “no individual organization could address all the identified challenges independently. Sustained collaboration and coordination across the recycling system is essential to addressing the challenges. It will take a network of federal, state, local and tribal governments, manufacturers, brands, non-profit organizations, recycling industry associations, and waste management companies to truly shift the system. To assist these efforts, EPA will continue to serve in its unique role as a convener and facilitator of the America Recycles Network efforts.”

Nebraska Materials Exchange Program Application

Identify the waste stream or surplus material you are generating or seeking. The more information provided, the more likely an exchange will occur. Questions? Call Keep Nebraska Beautiful at 800.486.4562. (or in Lincoln 486.4622) Please complete all applicable items. If you have more than one item, copy this form for each, or attach a list of materials & quantities.

Company/Organization _____ Date _____
 Contact _____ Email _____
 Mailing Address _____
 City _____ State _____ ZIP _____
 Phone () _____ Fax () _____

1. Is your company/organization a 501(c) 3 nonprofit organization? Yes No
2. May we release your name/address/phone to interested parties? Yes No
3. Are you SEEKING or GENERATING this material? Seeking Generating
4. Please Specify Material Here: *Generic name or primary usable constituent (If plastic, list mfg. & commercial name/grade #):

5. List quantity (in units: pounds, etc.): _____ Per: Day Week Month Quarter Year 1X only
6. Physical state: (if applicable) Liquid Slurry Solid Semi-solid Sludge Dust Cake Gas Other
7. Packaging: (circle one) Bulk Drums Dumpsters Gaylords Pallets Bales Other _____
8. General information as known: chemical composition, type of plastic, main ingredients, cost, pH, toxicity, reactivity, color, particle size, flash point, total solids, purchase date, industrial process generating this material, contaminants, etc.

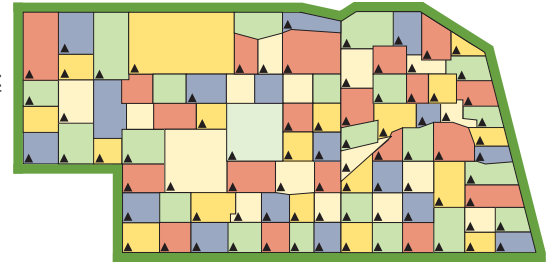

9. Available to interested parties (if applicable): Sample _____ Lab Analysis _____ Independent Analysis _____
10. Please list any items your company would be willing to donate to schools or nonprofit organizations.
 (Working computers, office furniture and equipment, cleaning supplies, etc.)

Thanks for your interest in the Materials Exchange. We'll keep in contact regarding your listing, & send email notices regarding the electronic publication of our quarterly newsletter The Link. If an Exchange referral results in a match, we'd appreciate the information - landfill diversion totals ensure the Exchange remains accessible & free to all Nebraskans.

Please mail, fax, or complete this form online:
