

EPA National Recycling Strategy

The Spring 2020 Issue of *The Link* included an overview of EPA's 2019 National Framework for Advancing the U.S. Recycling System. Having built on that framework with stakeholders the last two years, EPA last month released their National Recycling Strategy - Part One of a Series on Building a Circular Economy for All. Following is an overview of the strategy which can be found on the EPA website at www.epa.gov/system/files/documents/2021-11/final-national-recycling-strategy.pdf.

The National Recycling Strategy is focused on enhancing and advancing the national municipal solid waste (MSW) recycling system and identifies strategic objectives and stakeholder-led actions to create a stronger, more resilient and cost-effective U.S. MSW recycling system. It is part one of a series dedicated to building a circular economy for all. This substantially revised version of the National Recycling Strategy focuses on improving the nation's MSW recycling system and broadens the vision to include the full impact of materials while also recognizing the need to achieve environmental justice priorities. The National Recycling Strategy reflects the work of many stakeholders – including the public, companies, and non-governmental and community-based organizations – and input from other federal agencies, states, tribes and local governments. The U.S. MSW recycling system currently faces a number of challenges, including confusion about what materials can be recycled, recycling infrastructure that has not kept pace with today's diverse and changing waste stream, reduced markets for recycled materials, and varying methodologies to measure recycling system performance.

The National Recycling Strategy identifies actions to address these challenges and builds on the collaborative efforts by stakeholders from across the recycling system that began under the 2019 National Framework for Advancing the U.S. Recycling System.

Advancing MSW recycling alone will not achieve a circular economy for the United States; recycling is only one action in the toolkit. Work is necessary to broadly encompass areas not addressed here, including product redesign, source reduction and reuse. Recycling efforts in the United States comprise more than just the processing of MSW at materials recovery facilities (MRFs) and include many other materials, such as electronics, textiles and food waste. Future strategies will address these and other aspects of a circular economy for all.

A circular economy, as defined in the Save Our Seas 2.0 Act, means an economy that uses a systems-focused approach and involves industrial processes and economic activities that are restorative or regenerative by design, enable resources used in such processes and activities to maintain their highest value for as long as possible, and aim for the elimination of waste through the superior design of materials, products, and systems (including business models). It is a change to the model in which resources are mined, are made into products, and then become waste. A circular economy reduces materials use, redesigns materials and products to be less resource-intensive, and recaptures "waste" as a resource to manufacture new

materials and products. Circularity is embraced within the sustainable materials management (SMM) approach that EPA and other federal agencies have pursued since 2009. A circular economy approach under the SMM umbrella demonstrates continuity in our emphasis on reducing life-cycle impacts of materials, including climate impacts; reducing the use of harmful materials; and decoupling materials use from economic growth. The 2021 Strategy recognizes the need to implement a circular economy approach for all – reducing the creation of waste with local communities in mind and implementing materials management strategies that are inclusive of communities with environmental justice concerns.

The National Recycling Strategy is aligned with and supports implementation of the National Recycling Goal to increase the recycling rate to 50 percent by 2030. The 2021 Strategy includes five strategic objectives to create a more resilient and cost-effective national recycling system:

Objective A: Improve Markets for Recycling Commodities

We need to improve markets for recyclable materials and recyclable products and better integrate recycled materials into product and packaging designs.

- A1.** Promote market development.
- A2.** Produce an analysis of different types of end markets that considers resilience, environmental benefits and other relevant factors for decision makers.
- A3.** Increase manufacturing use of recycled material feedstocks in domestic manufacturing.

The Materials Exchange Program is managed by:

A4. Increase demand for recycled materials through policies, programs, initiatives and incentives.

A5. Continue to support research and development of technologies and products that will expand market opportunities.

A6. Explore possible ratification of the Basel Convention and encourage environmentally sound management of scrap and recyclables traded with other countries.

Objective B: Increase Collection and Improve Materials Management Infrastructure

Investment and innovation are necessary to improve the efficiency of materials processing infrastructure, increase collection of materials and create a more resilient recycling system.

B1. Improve understanding of available recycling infrastructure and needs.

B2. Increase awareness and availability of public and private funding and incentives and effective strategies to access the funding.

B3. Continue to fund research, development, demonstration and deployment of new technologies and processes for recycling.

B4. Increase consideration of recoverability and sustainability in the design of products.

B5. Optimize processing efficiencies at materials recovery facilities.

B6. Increase collection of recyclable materials.

Objective C: Reduce Contamination in the Recycled Materials Stream

Reducing contamination in the recycled materials stream will improve the quality of the recycled material, enabling more material to be recycled and reducing discarded material.

C1. Enhance education and outreach to the public on the value of recycling and how to recycle properly.

C2. Ensure resources are available for education and outreach initiatives.

Objective D: Enhance Policies and Programs to Support Circularity

Different policies and programs can be effective in increasing circularity. Efforts under this area aim to increase coordination, availability and accessibility of information on recycling programs and policies at the federal, state, tribal and

local levels.

D1. Strengthen federal coordination to support and encourage actions to improve the U.S. recycling system.

D2. Conduct an analysis of different policies that could address recycling challenges.

D3. Conduct a study on reflecting environmental and social costs in product pricing.

D4. Increase awareness of and continue voluntary public-private partnerships.

D5. Share best practices on policies, programs, funding opportunities and outreach through a free, publicly accessible online clearinghouse.

D6. Coordinate domestic and international interests.

Objective E: Standardize Measurement and Increase Data Collection

Different definitions and measurement practices create challenges in setting goals and tracking progress. We need more consistent methodologies to measure recycling system performance.

E1. Develop and implement national recycling system definitions, measures, targets and performance indicators.

E2. Create a tracking and reporting plan.

E3. Create recycled content measures.

E4. Coordinate domestic and international measurement efforts.

E5. Increase data availability and transparency about recyclable materials generated and the materials manufacturers need.

Next Steps

Over the coming few months, EPA will work collaboratively with stakeholders to develop a plan for implementing the 2021 Strategy. EPA will ensure communities have a seat at the table and are involved in both developing the implementation plan and executing the actions in this strategy. EPA is also committing to develop a new goal to reduce the climate impacts from materials use and consumption, which will complement existing national goals on recycling and the reduction of food loss and waste. EPA plans to collaborate across all levels of government, including tribal nations, and with public and private stakeholders to achieve these ambitious goals.

Nebraska Materials Exchange Program Application

Identify the waste stream or surplus material you are generating or seeking. The more information provided, the more likely an exchange will occur. Questions? Call Keep Nebraska Beautiful at 800.486.4562. (or in Lincoln 486.4622) Please complete all applicable items. If you have more than one item, copy this form for each, or attach a list of materials & quantities.

Company/Organization _____ Date _____
 Contact _____ Email _____
 Mailing Address _____
 City _____ State _____ ZIP _____
 Phone () _____ Fax () _____

1. Is your company/organization a 501(c) 3 nonprofit organization? Yes No
2. May we release your name/address/phone to interested parties? Yes No
3. Are you SEEKING or GENERATING this material? Seeking Generating
4. Please Specify Material Here: *Generic name or primary usable constituent (If plastic, list mfg. & commercial name/grade #):

5. List quantity (in units: pounds, etc.): _____ Per: Day Week Month Quarter Year 1X only
6. Physical state: (if applicable) Liquid Slurry Solid Semi-solid Sludge Dust Cake Gas Other _____
7. Packaging: (circle one) Bulk Drums Dumpsters Gaylords Pallets Bales Other _____
8. General information as known: chemical composition, type of plastic, main ingredients, cost, pH, toxicity, reactivity, color, particle size, flash point, total solids, purchase date, industrial process generating this material, contaminants, etc.

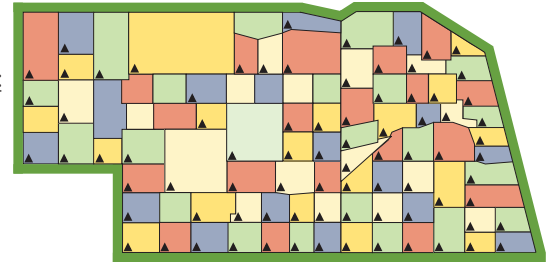

9. Available to interested parties (if applicable): Sample _____ Lab Analysis _____ Independent Analysis _____
10. Please list any items your company would be willing to donate to schools or nonprofit organizations.
 (Working computers, office furniture and equipment, cleaning supplies, etc.)

Thanks for your interest in the Materials Exchange. We'll keep in contact regarding your listing, & send email notices regarding the electronic publication of our quarterly newsletter The Link. If an Exchange referral results in a match, we'd appreciate the information - landfill diversion totals ensure the Exchange remains accessible & free to all Nebraskans.

Please mail, fax, or complete this form online:
