

Solid Waste Management and Recycling Solutions: The Bipartisan Infrastructure Law

Culled from **A Guidebook To The Bipartisan Infrastructure Law**, the following is a roadmap to the \$375 million available through EPA for Reuse and Recycling issues. It explains, in as much detail as currently available, how much funding is available at the program level. To see the full guidebook, go to www.epa.gov/system/files/documents/2022-02/building-a-better-america_final.pdf

Challenge: Approximately half of global greenhouse gas emissions are the result of natural resource extraction and processing. Increasing recycling reduces climate, environmental, and social impacts of materials use, and keeps valuable resources in use instead of in landfills. Municipal solid waste management has long suffered from a lack of investment. Some communities that lack waste management infrastructure do not have curbside waste collection services, recycling, or composting programs, which increases the burden on our landfills, decreases their capacity, and increases greenhouse gas emissions. Mismanaged waste also can compound social and economic conditions in historically underserved and overburdened communities. Batteries can start fires throughout the municipal waste management system from transportation, transfer facilities, to materials recycling facilities, scrap yards, and landfills, causing air pollution issues in already overburdened communities and threaten worker and first responder safety. When discarded improperly, such as in household trash or recycling, critical materials inside batteries are lost and cannot be recycled into new batteries.

Solutions: The Bipartisan Infrastructure Law is an historic investment in the health, equity, and resilience

of American communities. With unprecedented funding to support local waste management infrastructure and recycling programs, this funding will help expand access to recycling and composting programs nationwide, modernize an historic investment in the health, existing solid waste management infrastructure, improve consumer education and outreach, and help reduce contamination of the recycling and organics waste streams. By establishing a common set of best practices for battery recycling and a voluntary battery labeling program, the funding also will help make it easier for the American people to recycle their batteries while keeping workers, nearby communities, and waste management and recycling facilities safe.

Funding Overview: This funding falls into four major areas covered under this section – (1) The Solid Waste Infrastructure for Recycling Grants (\$275 million), (2) Reduce, Reuse and Recycle Education and Outreach Grants (\$75 million), (3) Battery Collection Best Practices (\$10 million), and (4) Voluntary Battery Labeling Guidelines (\$15 million).

- **Solid Waste Infrastructure for Recycling:** The Bipartisan Infrastructure Law provides \$275 million for grants under section 302(a) of the Save Our Seas 2.0 Act (Public Law 116–224) (\$55 million/year from Fiscal Year 2022-2026 to remain available until expended). These funds may be used to: implement the strategy developed under section 301(a) of the Save Our Seas 2.0 Act, support improvements to local post-consumer materials management, including municipal recycling programs; and assist local waste management authorities in making improvements to local waste management systems.
- **Reduce, Reuse, Recycle Education**

and Outreach Grants: The Bipartisan Infrastructure Law provides \$75 million (\$15 million year from Fiscal Year 2022- 2026 to remain available until expended) to award grants focused on improving the effectiveness of residential and community recycling programs through public education and outreach. Funded projects should inform the public about residential or community recycling programs, provide information about the recycled materials that are accepted, increase collection rates and decrease contamination.

- **Battery Collection Best Practices:** Provides \$10 million for fiscal year 2022, to remain available until September 30, 2026, for Environmental Protection Agency to develop best practices that may be implemented by State, Tribal, and local governments with respect to the collection of batteries.

- **Voluntary Battery Labeling Guidelines:** Provides \$15 million for fiscal year 2022 for a program to develop voluntary labeling guidelines for batteries and other forms of communication materials for battery producers and consumers about the reuse and recycling of critical materials from batteries.

Existing Resources: This is a series of new programs.

Solid Waste Infrastructure for Recycling Infrastructure Grants

Federal Agency: EPA

Bureau or Account: State and Tribal Assistance Grants

Funding amount: \$275,000,000

Period of Availability: Until expended

Funding Mechanism: Cooperative Agreements and/or Grants

Recipients: States (including the District of Columbia, a territory or possession of the United States, or any political subdivision of a State, Tribe, or territory), Tribes, Inter-Tribal Consortia consistent with the requirements in 40 CFR 35.504(A),

The Materials Exchange Program is managed by:

Former Indian Reservations in Oklahoma (As Determined by The Secretary of The Interior), and Alaskan Native Villages as defined in Public Law 92-203.

Description: Communities across the country are burdened by pollution impacts from inefficient waste management systems. This historic investment will transform recycling and solid waste management across the country while creating jobs.

Eligible Uses: Provide grants to implement a strategy to improve post-consumer materials management and infrastructure; support improvements to local post-consumer materials management and recycling programs; and assist local waste management authorities in making improvements to local waste management systems.

Next Milestone: Stakeholder outreach and engagement to inform development of grant program to begin: (Estimated): 2nd quarter 2022

Funding Opportunity Availability: (Estimated) 4th quarter 2022

Reduce, Reuse, Recycling Education and Outreach Grants

Federal Agency: EPA

Bureau or Account: State and Tribal Assistance Grants

Funding amount: \$75,000,000

Period of Availability: Until expended

Funding Mechanism: Cooperative Agreements and/or Grants

Recipients: States, a Unit of Local Government, Tribal Governments (federally recognized), A Native Hawaiian Organization, The Department of Hawaiian Homelands, The Office of Hawaiian Affairs, A Non-Profit Organization, Or A Public-Private Partnership

Description: Communities across the country are burdened by pollution impacts from inefficient waste management systems. This historic investment will transform public education and outreach regarding how to reduce, reuse, and recycle right.

Eligible Uses: To award grants focused on improving material recycling, recovery, management, and reduction. To improve the effectiveness of residential and community recycling programs through public education and outreach. Funded projects should inform the public about residential or community recycling programs, provide information about the recycled materials that are accepted, increase collection rates & decrease contamination.

Next Milestone: Stakeholder outreach and engagement to inform development of grant program to begin: (Estimated): 2nd quarter 2022

Funding Opportunity Availability: (Estimated) 4th quarter 2022

Battery Recycling Best Practices

Federal Agency: EPA

Bureau or Account: Environmental Programs and Management

Funding amount: \$10,000,000

Period of Availability: Fiscal Year 2022, to remain available until 9/30/2026.

Funding Mechanism: Contracts

Description: This investment will promote the safe handling of used batteries and improve battery recycling programs. The Environmental Protection Agency will develop best practices that may be implemented by State, Tribal, and local governments with respect to the collection of batteries to be recycled in a manner that to the maximum extent practicable, is technically and economically feasible for State, Tribal, and local governments; is environmentally sound and safe for waste management workers; and optimizes the value and use of material derived from recycling of batteries. The Environmental Protection Agency will develop the best practices in coordination with State, Tribal, and local governments and relevant nongovernmental and private sector entities.

Next Milestone: (Estimated): Program development to begin in 2nd quarter 2022.

Battery Labeling Guidelines

Federal Agency: EPA

Bureau or Account: Environmental Programs and Management

Funding amount: \$15,000,000

Period of Availability: Fiscal Year 2022, to remain available until 9/30/2026.

Funding Mechanism: Contracts

Description: This investment will promote the safe handling of used batteries and improve battery recycling programs. Establishes a program to promote battery recycling through the development of voluntary labeling guidelines for batteries and other forms of communication materials for battery producers and consumers about the reuse and recycling of critical materials from batteries. The purposes of the program are to improve battery collection and reduce battery waste, including by identifying battery collection locations and increasing accessibility to those locations; promoting consumer education about battery collection and recycling; and reducing safety concerns relating to the improper disposal of batteries.

Next Milestone: (Estimated): Program development to begin in 2nd quarter 2022.

Nebraska Materials Exchange Program Application

Identify the waste stream or surplus material you are generating or seeking. The more information provided, the more likely an exchange will occur. Questions? Call Keep Nebraska Beautiful at 800.486.4562. (or in Lincoln 486.4622) Please complete all applicable items. If you have more than one item, copy this form for each, or attach a list of materials & quantities.

Company/Organization _____ Date _____
 Contact _____ Email _____
 Mailing Address _____
 City _____ State _____ ZIP _____
 Phone () _____ Fax () _____

1. Is your company/organization a 501(c) 3 nonprofit organization? Yes No
2. May we release your name/address/phone to interested parties? Yes No
3. Are you SEEKING or GENERATING this material? Seeking Generating
4. Please Specify Material Here: *Generic name or primary usable constituent (If plastic, list mfg. & commercial name/grade #):

- _____
5. List quantity (in units: pounds, etc.): _____ Per: Day Week Month Quarter Year 1X only
 6. Physical state: (if applicable) Liquid Slurry Solid Semi-solid Sludge Dust Cake Gas Other
 7. Packaging: (circle one) Bulk Drums Dumpsters Gaylords Pallets Bales Other _____
 8. General information as known: chemical composition, type of plastic, main ingredients, cost, pH, toxicity, reactivity, color, particle size, flash point, total solids, purchase date, industrial process generating this material, contaminants, etc.

- _____
9. Available to interested parties (if applicable): Sample _____ Lab Analysis _____ Independent Analysis _____
 10. Please list any items your company would be willing to donate to schools or nonprofit organizations.
(Working computers, office furniture and equipment, cleaning supplies, etc.)

Thanks for your interest in the Materials Exchange. We'll keep in contact regarding your listing, & send email notices regarding the electronic publication of our quarterly newsletter The Link. If an Exchange referral results in a match, we'd appreciate the information - landfill diversion totals ensure the Exchange remains accessible & free to all Nebraskans.

Please mail, fax, or complete this form online:
